

ERNEST POZZONI, MSc Digital Transformation

**Market Intelligence & Technology Strategy Analyst | Information Security (CII Sec Member) |
Toastmasters Public Speaker and Professional Keynote Speaker**

+44 7341 933 599; ernest.pozzoni@proton.me; St Albans, UK; Citizenship: EU (Italy) and UK

PROFESSIONAL SUMMARY

Market Intelligence & Technology Strategy Analyst recognised for learning rapidly and adapting quickly to new markets, sectors and technologies. A cross-sector career spans business development, commercial intelligence, digital transformation and information-security governance, supported by hands-on work with software, data, cloud, Linux and AI-assisted automation. Public and keynote speaker who turns complex issues into clear decisions and practical action.

COMPETENCIES

*** Core:** Stakeholder engagement and interviews; requirements elicitation and analysis; current-state, gap and option assessment; business and commercial analysis; software rationalisation; process and operating-model analysis; transformation-roadmap development; information-security governance and ISMS initiation; risk identification and escalation; supplier, data and technology-dependency assessment; commercial due diligence and open-source intelligence research; business-case and financial-scenario modelling; project coordination, action tracking and stakeholder follow-up; structured written communication; presentation, public speaking and workshopping.

*** Exposure:** EU and UK public-sector environments; local government; VSAT, satcom and telecommunications; the wider space-sector ecosystem; cloud security; open-source software, open standards and digital sovereignty; AI-assisted research automation.

*** Tools & Platforms:** LibreOffice Calc, Excel; OpenProject, Jira; Apache Superset, Tableau, Power BI; JASP; SQL; SuiteCRM, Microsoft Dynamics 365 for CRM; Amazon Web Services (AWS); Linux/UNIX administration, networking, automation with Bash and Python; Windows - power user level; Ollama, Copilot Studio, Gemini Enterprise Agent Platform.

PAID AND VOLUNTEER EXPERIENCE

Independent ISO/IEC 27001 ISMS Reference Portfolio

Aug 2026 to Present

*** Building** a portfolio of model ISMS cases for a small VSAT company, a robotics SME and a GP practice. The accompanying Project Portfolio records work in progress, planned outputs and related professional initiatives, clearly distinguishing active, scheduled, exploratory and planned activities.

Business Development and Research Analyst - NDA - Part Time Self-Employment

Apr 2021 to Dec 2025 - Link Communications Systems - Remote, UK, England, London

- * **Provided** business development, commercial intelligence and opportunity assessment for a specialist satellite-connectivity SME across satcom, rural connectivity, drone applications, sustainable energy, mariTime logistics, universities, NGOs and reseller channels.
- * **Assessed** approximately 50 early inbound enquiries, followed by approximately 5-15 annually as LEO services gained adoption; advanced three international enquiries to substantive opportunity stage involving defence-related drone connectivity in Southeast Asia, Nigerian sustainable-energy infrastructure and expansion of an existing mariTime-logistics deployment.
- * **Conducted** enhanced commercial due diligence and open-source business-intelligence research on international prospects and partners, examining corporate identity, ownership, management, commercial credibility and reputational risk; identified and escalated material red flags before company resources were committed.
- * **Produced** Power BI market briefings, opportunity assessments, red-flag analyses, collaboration proposals and stakeholder communications; also supported prospect meetings, partner development, CRM management, sales follow-up and industry-event activity in Germany while developing practical knowledge of the wider VSAT and satcom ecosystem.
- * **Attached Project Portfolio:** Rural-connectivity opportunity analysis; Network Operations Centre improvement framework for a four-person satellite-operations team; and an open source and open-standards operating-model proposal identifying approximately £5,000-£28,000 in possible three-year gross savings and associated governance and implementation risks.

IT Consultant - Self-Employment

Mar 2025 - national bank confidential client - face to face, UK, England, St Albans

- * **Delivered** a one-off advisory and learning session on cloud computing, AI, OSS-first approaches and project presentation for a business-change professional preparing for a Regional AI Lead role.

AWS Cloud Architecture Project Lead and Architecture Designer - Capstone Project

July 2024 - confidential client via Skills City Cloud Security Bootcamp - Remote, UK

- * **Led** and project-managed a three-person team through a 12-week client-based project, coordinating responsibilities and deadlines through Jira and directing the preparation of the overall report, technical documentation, service demonstrations and client presentation.
- * **Interpreted** the client requirements and personally designed a secure, scalable and cost-aware AWS proof-of-concept architecture incorporating VPC segmentation, role-based access, encryption, monitoring, audit logging, relational data storage and private backup connectivity.
- * **Completed** the architecture and supporting deliverables as a proof of concept; the system was not deployed into production.

Invited Keynote Speaker

June 2024 - Keynotion - OpEx & Process Transformation Hamburg Summit - in person, EU

- * **Delivered** a keynote presentation at a professional summit on digital strategy and transformation.

ICT Strategy Analyst / Transformation Consultant - Self-Employment

Apr 2023 to Sep 2023 - North Kesteven District Council - Remote, UK, England, Sleaford

* **Conducted** ICT-refresh and software-rationalisation discovery across nine specialised service areas, mapping software stacks, overlapping tools, legacy dependencies, operational needs, local priorities and medium- to long-term ICT requirements through interviews with directors, managers, team leaders and staff.

* **Designed** and analysed a 437-employee questionnaire and reviewed 613 software assets, using LibreOffice Calc and OSS machine-learning models to assess software usage, staff readiness, governance attitudes and open-source opportunities.

* **Developed** a lean transformation deployment framework, later positioned as a digital-transformation journey, assessing the feasibility of greater systems standardisation while accounting for specialist workflows, stakeholder constraints and change-readiness risks.

* **Identified** realistic software-rationalisation opportunities, helping reframe full systems unification into a lower-risk deduplication pathway, with potential IT licence savings of approximately £285,000 over three years.

* **Attached Project Portfolio:** Independent follow-on roadmap exploring approximately £35,000-£240,000 in possible three-year gross avoided-cost exposure, and a seven-dimensional assessment of digital transformation in British councils.

Public Speaker, Club Officer and Area Public Relations - Volunteering

2022 to Present - Toastmasters International - UK and EU

Deliver speeches and evaluations; have **served** as Secretary and Vice President Membership; elected Vice President Education for 2026–2027; **support** Area public relations; **facilitate and chair** Club Officer Training sessions; **lead** outreach, venue selection and launch planning for a new Harpenden club.

Early Public Sector Support Experience - Employment

2005 to 2018 - In person, EU, Italy, Varese

Earlier roles included mayoral secretariat and library administration, civil-service recruitment support, civil-protection office set-up involving regulation drafting and engagement with mayors, and eight years at the Italian Ministry of Economy and Finance switchboard.

EDUCATION

* **Academic:** 2022-2024 - UK - MSc Digital Transformation, University of Hull; 2019-2021 - UK - BSc International Business Management, Anglia Ruskin University of Cambridge

* **Certifications & Training:** 2021-2026 - ISO/IEC 27001:2022 Lead Implementer; Lean Six Sigma Yellow Belt; Industrial Internet of Things (IIoT); Linux system, networking and cloud; VSAT/RF.

* **Languages:** English (full professional); Italian (native); French (basic written, basic spoken, learning).
